Dear Jamil

Thank you for your letter dated 7th July 2008. I think that the health deafinitions DVD's would be an invaluable tool in educating and empowering deaf people. I know, from my own practice, just how difficult it can be to explain the process of investigation and treatment of even relatively straight forward medical conditions. The complexity of some of the issues that you are dealing with in your DVD's are such that it would be almost impossible to explain them reliably in primary care. In addition, I am sure that my colleagues in Secondary care, those who are carrying out the procedures that you tackle in the DVD's, would warmly welcome your initiative.

Yours sincerely

Dr J P Maguire
